

Attachments for SVE Trucks

Attachment for SVE Truck - Svetruck started business in the year 1977 with a clear vision of what type of company they would like to be and what particular sort of merchandise they hoped to manufacture. They designed a durable, service-friendly and reliable forklift. Svetruck specializes in creating lift trucks which enable the person operating it to function well within difficult environments. Svetruck believes that being capable of executing successful and safe material handling in the best way possible helps to add to a positive work environment.

Their facility in Ljungby is home to the creation of forklifts, container handlers as well as log-stackers. Nowadays, Svetruck is proudly supplying lift trucks all around the globe.

Focused on the future, Svetruck is still fully committed to maintaining their outstanding status of manufacturers of durable and reliable lift trucks. Their fundamental method to solid experience, high quality and more than thirty years of knowledge in the subject, means they could offer the market excellent solutions for all their material handling requirements.
