

Aerial Work Platforms

Aerial Work Platform - There are many attachments meant for lift trucks that can be used in order to help expand the capabilities of your lift truck and allow you to lift things, handle materials with greater ease or to finish clean-up jobs.

A lot of the attachments are particularly designed to fit on the forks themselves. Fork extensions for example, are utilized whenever you require a lot more blade length, which increases lifting capability. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular attachments are another kind utilized when transporting rolled material to be able to make certain it does not roll off of the standard flat blades.

Lifting accessories could be pivoting and telescoping crane attachments. They are available in various kinds. These attachments are normally meant for transferring metal bars, poles, lumber or whichever type of bulky objects. Other accessories such as different styles of hooks and hook plates are presented to be able to lift items utilizing a sling or chain. Magnetic lifters and slab lifters are other stuff which could be utilized along with hook attachments. Slab lifters are specialized accessories which are intended for carrying various materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that connect to your forklift so as to make transporting rolls of carpet a lot easier. The accessory connects onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are numerous other kinds of forklift accessories which can be designed for facility maintenance like snow blades. These blades connect to front end loaders and could transfer materials like for instance soil, snow and dirt. Other popular cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the lift truck forks hook onto for sweeping large spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up fast and simple.

Material spreaders are other accessories used on lift trucks. These spreaders are handy for a variety of applications like for instance spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Work platforms are another optional lifting accessory that many businesses use on a daily basis. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models obtainable which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location using the forklift. Larger platform units have additional space for workers to carry tools and other necessary items intended for the job. Usually work platforms are made of steel or ploy material.
